## Our Pipeline

```
[/et_pb_text] [et_pb_text _builder_version="3.0.62" background_layout="light"
text_orientation="left" border_style="solid" ]
```

FDL has a robust pipeline of CFTR “correctors,” “potentiators,” and “2nd generation modulators” as well as backup compounds for each of these approaches. FDL169 has been in multiple Phase I clinical trials in both healthy volunteers and patients with CF. FDL176 is also in clinical development. We continue to optimize our “second generation correctors”.
